

**Enhancements**

**eChalk Notify**

Improved caching and offline experience for the eChalk Notify App.

**Bug Fixes**

**Accessibility – Brochure Theme**

We have corrected a contrast issue that has affected text blocks and tables in the Brochure theme when certain primary colors are in use for schools. Previously the source of the event was not displayed in a high enough contrast ratio. This has been corrected for any color that a school chooses to ensure that it will always meet the correct contrast ratio.

**iCal Subscriptions**

We have corrected a fix with Office 365 and iCal subscriptions. Previous subscriptions were not displaying recurring events properly. All subscriptions should update automatically now with recurring events – no need for any changes.
