

Branded MOBILE APP

Your community's complete, central resource for information, available 24/7 in the palm of their hands

Your school's unique branding & logo goes here!

Features at a glance

Increase student and family engagement with a mobile-first communication strategy

A centralized hub to share your school spirit that's branded with your logo, colors, & more

Translate app content to over 40 different languages to reach your whole community

Includes unlimited push notifications to ensure your message is received

Why does my school need an app?

Reach who you need where they are: on their mobile devices

Consolidate messaging and oversight of school communication

Give families one central location to access important information

How it Works

1. Your school's branded app goes live

Once your app is complete, it will go live in both The App Store and The Google Play Store.

2. Curate your app's content

Your community downloads the app to their mobile devices, and administrators use the eChalk CMS to publish news, events, quick links, and more.

3. Connect with your community

Educators can easily and quickly connect with students, families, and staff through the app.

Edlio and eChalk have partnered to form one communication and accessibility team for your school. Choose now from two different website products based on your budget and school needs, plus a branded app, messaging, and online payment solutions. All clients receive unlimited tech support, a dedicated client success specialist, and built-in accessibility tools.
